Section 1 - Identification of the Substance/Mixture and of the Company/Undertaking

Product Name: WATER - MAT REPLENISHER Product Code: S85-0067

Strathmore Products, Inc. 1970 W. Fayette St. PO Box 151 Syracuse, NY 13201 315-488-5401

Emergency Phone (Day) M-F 8a-5p EST: 315-488-5401 Emergency Phone (Night) All other Hours: Health - Poison Control Center: 315-476-4766 Spills - Chemtel: 1-800-255-3924

Product Use: Additive Not recommended for: No Information Available.

Section 2 - Hazards Identification

Flammable liquid3Flash point >= 23°C and <= 60°C (140°F)	GHS Ratings:				
< <td>< 14 days, visible necrosis in at least one animal</td> Eye corrosive 1 Serious eye damage: Irreversible damage 21 days after exposure, Draize score: Corneal opacity >= 3, Iritis > 1.5 Skin sensitizer 1 Skin sensitizer GHS Hazards	< 14 days, visible necrosis in at least one animal		Flammable liquid	3	Flash point >= 23°C and <= 60°C (140°F)
Eye corrosive 1 Serious eye damage: Irreversible damage 21 days after exposure, Draize score: Corneal opacity >= 3, Iritis > 1.5 Skin sensitizer 1 Skin sensitizer GHS Hazards H226 Flammable liquid and vapour H314 Causes severe skin burns and eye damage H317 May cause an allergic skin reaction H318 Causes serious eye damage GHS Precutions P210 Keep away from heat/sparks/open flames/hot surfaces – No smoking P233 Keep container tightly closed P240 Ground/bond container and receiving equipment P242 Use explosion-proof electrical/ventilating/lighting equipment. Section 4 - First Aid Measures

4.1 Description of First Aid Measures

General Advice - Show this safety data sheet to the doctor in attendance.

Inhalation - Move to fresh air. If symptoms persist, call a physician.

Eye Contact - Immediately flush with plenty of water. After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. Keep eye wide open while rinsing. Call a physician immediately.

Skin Contact - Wash off immediately with soap and plenty of water. Take off contaminated clothing. Get medical attention if irritation persists.

Ingestion - Do NOT induce vomiting. Drink plenty of water. Never give anything by mouth to an unconscious person. Get medical attention immediately if symptoms occur.

Protection of First-aiders - Remove all sources of ignition. Use personal protective equipment.

Section 5 - Firefighting Measures

Flash Point: 57 C (135 F) LEL:

UEL:

5.1 Extinguishing Media

Suitable Extinguishing Media - Carbon Dioxide (CO2). Dry powder. Dry chemical foam. Water spray.

Unsuitable Extinguishing Media - Do not use a solid water stream as it may scatter and spread fire.
5.2 Special Hazards Arising from the Substance or Mixture - No additional information available.
Hazardous Combustible Products - No additional information available.

5.3 Advice for Firefighters - As in any fire, wear self-contained breathing apparatus and full protective gear.

Protective Equipment - Do not enter a fire area without proper protective equipment, including respiratory protection. Wear a self containing breathing apparatus.

Section 6 - Accidental Release Measures

6.1 Personal Precautions, Protective Equipment and Emergency Procedures - ELIMINATE all ignition sources

(no smoking, flares, sparks or flames in immediate area). Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use personal protective equipment. Avoid contact with skin, eyes and clothing. **6.2 Environmental Precautions** - Prevent further leakage or spillage if safe to do so. Prevent entry into waterways, sewers, basements or confined areas.

6.3 Methods and Materials for Containment and Cleaning Up - A vapor suppressing foam may be used to reduce vapors. Dike far ahead of liquid spill for later disposal.

Dam up. Soak up with inert absorbant materials (e.g. sand, silica gel, acid binder, universal binder, sawdust). Use clean non-sparking tools to collect absorbed material. Keep in suitable, closed containers for disposal.

Section 7 - Handling and Storage

7.1 Precautions for Safe Handling - Keep away from open flames, hot surfaces and sources of ignition. Take precautionary measures against static discharges. Use only in an area containing flame proof equipment. To avoid ignition of vapors by static electricity discharge, all metal parts of the equipment must be grounded. Use only in area provided with appropriate exhaust ventilation. Wear personal protective equipment. Do not breathe vapors or spray mist. Avoid contact with skin, eyes and clothing.

Hygiene Measures - When using, do not eat, drink or smoke. Provide regular cleaning of equipment, work area and clothing.

7.2 Conditions for Safe Storage, Including Any Incompatibilities - Keep containers tightly closed in a dry, cool, well-ventilated place. Keep away from open flames, hot surfaces and sources of ignition.

7.3 Regulatory Requirements - No additional information.

Section 8 - Exposure Controls/Personal Protection					
Chemical Name / CAS No.	OSHA Exposure Limits	ACGIH Exposure Limits	Other Exposure Limits		
Water 7732-18-5	Not Established	Not Established	Not Established		
N,N-DiMethylEthanolAmine 108-01-0	Not Established	Not Established	Not Established		

8.1 Engineering Contols - Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use explosion proof ventilation equipment.

Ventilation - Local guidelines on emission limits for volatile substances must be observed for the discharge of exhaust air containing vapor. Avoid discharge to the environment.

Administration Controls - No information available.

8.2 Exposure Controls - Avoid all unnecessary exposure. Gloves. Protective Goggles. For certain operations, additional Personal Protective Equipment (PPE) may be required.

Hand Protection - Wear protective gloves. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves. Impervious gloves (neoprene) should be worn to protect against skin contact. A combination of barrier cream, applied before exposure and gloves is recommended.

Eye Protection - Chemical goggles and/or face shields are required to prevent potential eye contact, irritation or injury.

Skin and Body Protection - Wear suitable protective clothing. Chemical resistant safety shoes. Protective apron.

Respiratory Protection - Wear appropriate mask. A NIOSH/MSHA approved organic vapor respirator/supplied air or self-contained breathing apparatus must be used when vapor concentration exceeds applicable exposure limits. In applications where aerosols or vapors are emitted, a full face organic vapor cartridge respirator with a particulate pre-filter should be worn. In confined areas and in emergency situations, use a self-contained breathing apparatus or other air supplied full face respirator.

Contaminated Gear: Launder mildly contamination clothing. Dispose of moderate/heavily contaminated clothing, including shoes.

Section 9 - Physical and Chemical Properties

Color CLEAR

Vapor Pressure: 4.0 mmHg Weight Per Gallon 7.94

Boiling range: 100 - 135°C

Viscosity - 3Z NA

Lbs VOC/Gallon Less Water 7.41

Section 10 - Stability and Reactivity

Odor AMINE LIKE

Flash Point 135°F,57°C

Vapor Density: 3.1

Freezing point: N/A

Grams VOC/Liter Less Water 887.6

10.1 Reactivity - No data available.

10.2 Chemical Stability - Product is stable under recommended conditions. STABLE

10.3 Incompatible Materials - Strong oxidizing agents. Strong bases. Strong acids. Materials that react violently or explosively with water.

10.4 Conditions to Avoid - Heat, flames and sparks. Avoid Freezing.

No additional information available

10.5 Possibility of Hazardous Reactions - None under normal processing.

10.6 Hazardous Decomposition Products - Carbon oxides. Hydrogen Chloride. Hydrogen Fluoride.

No additional information available

Hazardous polymerization will not occur.

Section 11 - Toxicological Information

Mixture Toxicity

Oral Toxicity LD50: 4,688mg/kg Dermal Toxicity LD50: 3,172mg/kg Inhalation Toxicity LC50: 4,267mg/L

Component Toxicity

108-01-0

N,N-DiMethylEthanolAmine Oral LD50: 1,803 mg/kg (Rat) Dermal LD50: 1,220 mg/kg (Rabbit) Inhalation LC50: 1,641 ppm (R

11.1 Information on Toxicological Effects -

Target Organ Effects - Central nervous system (CNS). Respiratory system.

Acute Toxicity

Inhalation - May cause irritation of respiratory tract. Eye Contact - Irritating to eyes. Causes serious eye irritation. Skin Contact - Causes skin irritation. Ingestion - Ingestion may cause irritation to mucous membranes.

100-41-4 Ethylbenzene

If the coating contains ethylbenzene. Ethylbenzene is classified by IARC as possibly carcinogenic to humans (group 2B) based on inadequate evidence in humans & sufficient evidence in lab animals. Lifetime inhalation exposure to high concentrations of ethylbenzene in mice & rats results in increases in certain types of cancer, such as liver & lung tumors in mice & kidney tumors in rats. These effects were not seen when the animals were exposed to lower concentrations. There is no evidence ethylbenzene causes cancer in humans.

1333-86-4 Carbon Black

If the coating contains carbon black. Carbon black is classified by IARC as possibly carcinogenic to humans (group 2B) based on experimental animal testing data. However there is insufficient evidence in humans for its carcinogenicity.

13463-67-7 Titanium Dioxide

If the coating contains titanium dioxide. Titanium dioxide is classified by IARC as possibly carcinogenic to humans (group 2B). Titanium dioxide is suspected of causing cancer by inhalation, which is not a viable route of entry as all titanium dioxide is dispersed into a liquid mixture in coatings.

Section 13 - Disposal Considerations

13.1 Waste Treatment Methods

Waste from Residues/Unused Products - Dispose of in accordance with local regulations.

Contaminated Packaging - Empty containers should be taken to an approved waste handling site for recycling or disposal.

Section 14 - Transportation Information

Disclaimer: Any given paint product can be shipped in different size containers, ranging from a pint can to bulk tanks. The shipping regulations in the United States vary depending on container size. The Basic Description given below are for shipments in fully regulated non-bulk containers, where the UN ID number, Proper Shipping Name, (technical names, if any), Packing Groups & Hazard Class (subsidiary risks, if any) are given. This section does not cover packaging exceptions, such as smaller quantities that can be shipped in combination packages i.e. Limited Quantity or Consumer Commodity with or without basic descriptions or shipping papers. Also not covered are exceptions given for products that do not sustain combustion and are excepted from regulations under certain modes of transportation. Nor for products containing Reportable Quantities (RQ's) of hazardous substances when shipped in bulk, but not reportable when shipped in non-bulk packaging. All subsequent shipping of this product must be done by properly trained and certified employees under the specific competent authority's regulations.

- None

Section 16 - Other Information

Other information - Non-combustibility of waterborne coatings: Since they contain large amounts of water, waterborne paints are classified as noncombustible by most standards. Because they contain no solvents, latex paints will neither flash nor burn. However, water soluble coatings in which the organic solvent may be 20% of the solvent mixture, will have a closed-cup flash point similar to that of the organic solvent, but will not support combustion. Most safety regulations concerning the storage of flammable liquids are based largely on the flash point of the material. Many waterborne coatings have flash points comparable to those of solvent-borne coatings. The flash point of waterborne paint is usually close to the flash point of the most volatile solvent. Since the predominant volatile component of waterborne paints is water, the closed-cup flash point does not give an accurate indicator of the fire hazard. Ignition of a flammable liquid is dependent upon obtaining a concentration of flammable vapor in the air over the liquid surface that exceeds the lower flammability limit. In open tanks, waterborne paints containing 20% to 35% organic solvent do not ignite or burn.

User's Responsibility - The responsibility to provide a safe workplace remains with the user. The user should consider the health hazards and safety information contained herein as a guide and should take those precautions required as an individual operation to instruct employees and develop work practice procedures for a safe work environment. It is the responsibility of the user to comply with all applicable federal, state and local laws and regulations. To the best of our knowledge, the information contained herein is accurate. However, Strathmore Products, Inc. assumes no liability whatsoever for the accuracy, reliability or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. Since conditions of handling and use are beyond our control, we make no guarantee of results and assume no liability for damages incurred by use of this material. All materials may present unknown health and safety hazards and should be used with caution. Although certain hazards are described herein, we cannot guarantee that these are the only hazards which exist.
